

## **PROCAD Software Becomes Independent Software Vendor Partner to Autodesk** Recognized for Expertise in Plant Design Solutions

**Calgary, Alberta, Canada - November 12, 2007** – PROCAD Software today announced its relationship with Autodesk as an Independent Software Vendor (ISV). In addition to PROCAD's comprehensive 2D/3D plant design solutions, the company will now also offer customers the choice to purchase AutoCAD or AutoCAD P&ID in a one-stop-shopping solution. PROCAD Software solutions are designed to enhance the businesses of Autodesk and PROCAD's mutual customers by providing them with a single point of software acquisition improving both delivery of product and cost effectiveness due to the efficiencies inherent in software bundling.

“At Autodesk, our goal is to continue our leadership in design with the most comprehensive solution,” said Masako Takagi, director, ISV NA Channel at Autodesk. “We recognize that our ISV partners, such as PROCAD Software, have unique offerings that allow both parties to mutually extend value to our customer base.”

PROCAD is a Calgary, Canada-based company whose customer base includes engineering and resource companies in process plant industries ranging from multi-national companies to small companies in 40 countries. With more than 7500 seats of software sold, PROCAD is known for providing products rich in functionality and ease of use while also providing a cost-effective solution that suits every budget.

By building customized products and services using the world's leading design software for the manufacturing, building and construction, and media and entertainment markets, Autodesk ISV partners address niche requirements in the industries or markets they serve. These partners specialize in developing, bundling or integrating their software solutions with Autodesk applications, drawing on a deep understanding of their customers' business requirements in areas such as architecture, building systems engineering, structural engineering, civil engineering, geospatial information, manufacturing, data management, collaboration, education and government. Autodesk ISV partners benefit from Autodesk marketing, materials and events to effectively reach and serve more than eight million users worldwide.

### **About PROCAD Software**

PROCAD offers designers today's most advanced piping and plant design solutions available. 2D DESIGNER and 3DSMART are packed with the tools needed to manage complex projects more efficiently and cost-effectively than ever thought possible.

With a focus on continual improvement, PROCAD is committed to creating design solutions of the highest standards that not only meet our clients' expectations, but exceed them.

Our 2D DESIGNER Piping Suite software includes the dynamic AutoFLOW, AutoORTHO and AutoISO applications. We are also proud to offer AutoELECTRIC for electrical drafting and a vast array of product features resulting in cost-effective, high-performance 2D software.

Our cutting-edge 3D software, 3DSMART simplifies every aspect of the design process, creating a user-friendly environment where departments work smarter and share information through a centralized database.

Both products use proven technologies, giving designers the tools needed to accomplish their goals efficiently and cost-effectively. Our piping design software is so easy to learn and use that it drastically improves productivity as soon as it is implemented.
